To whom it may concern,

I would like to express, it has been a real pleasure having Bindu Sadler as our company **Graphic/ Web Designer** at Gasmaster Industries. In her designer role, I've recognized several core strengths in her performance and work ethics.

Bindu is fully capable of "wearing lots of hats." She served as a one person, graphic designer, web designer, developer and designer of many different websites. Bindu served as the creative source and producer of all company marketing materials, consisting of brochures, catalogues, banners, and even several industrial boiler casings. In addition, Bindu managed our international network, coordination and planning of foreign marketing material.

Being very organized and methodical in solving problems effectively, Bindu's ability has served us well, from her time of hire, to her leaving due to relocation to Toronto. I am confident Bindu would've continued to escalate her service and ability, providing increasing value to the company.

Bindu sought new ways to continuously improve our websites, in order to increase company awareness. Bindu has been diligent, very effective in her work, and a great value to our company.

As Office Manager of Gasmaster Industries, I give Bindu my strong professional endorsement, and believe she would be an asset to any company.

Sincerely,

Debbie Hargreaves
